

# Thermal Wellies

## Features

---

The thermal wellies have deep grooves in the **flexible bottom**, for better **foothold**.

The thermal wellies are lined with **wool**, which along with the aluminum membrane in the sole helps **keep the feet warm**.

The thermal wellies can be **washed in the machine** on a 30°C wool program.

The thermal wellies are moulded from the lightweight rubber **Megol**. Megol is durable and at the same time it provides great **mobility** for the child.
